Full Stack PROJECTS

CHATTING APP

I created complete chatting app using MERN and socket.io for realtime sending messages and i implement jwt authentication system and much more other functionalities.

LINKEDIN APP

I created a LinkedIn clone with MERN stack, including authentication, profiles, connections, sending email if new user login or accepting connection requests. and real-time notifications and updates.

Todo App

I created Todo app using jwt authentication for secure user authentication and searching filtering and pagination

Frontend PROJECTS

I created more than 30 project in react his live link is present in my portfolio
